

Ionut Adrian Moraru

Full-Stack Software Engineer (Node.js · React · TypeScript)

Drobeta-Turnu Severin, Romania · Remote (EET / UTC+2, overlaps EU & US-East mornings)
morion4000@gmail.com · +40 723 047 423 [linkedin.com/in/morion](https://www.linkedin.com/in/morion) · github.com/morion4000 · morion4000.com

SUMMARY

Full-stack engineer with **15+ years** building web products end-to-end — from MVP to production scale — in **Node.js, React, and TypeScript**. Remote my entire career, comfortable owning backend services, frontend apps, cloud infrastructure, and AI/LLM integration. Founder-level ownership across AI, EV, and SaaS products: I ship autonomously and move fast.

EXPERIENCE

Full-Stack Developer — GetSite · Feb 2024 – Present

Building an AI-powered website builder from the ground up: users describe what they want and the platform generates fully functional websites.

- Own the full stack — Node.js/TypeScript backend services, React frontend, AWS infrastructure, and AI/LLM integration.
- <ADD METRIC: e.g. "Generated X,000+ sites for Y users" / "cut generation time to Z seconds">
- **Stack:** TypeScript, Node.js, React, AWS, MongoDB, AI/LLM integration.

Game Developer — Haunted Tower · Jan 2022 – Jan 2024

Designed and shipped a cross-platform tower-defense game solo (web + mobile).

- Owned the entire lifecycle: game design, development, deployment, and publishing via CapacitorJS.
- <ADD METRIC: e.g. downloads / active players / store rating>
- **Stack:** TypeScript, Phaser 3, CapacitorJS, HTML5 Canvas.

Full-Stack Engineer — eDRV · Mar 2020 – Dec 2021

Built an API platform letting businesses and developers integrate EV charging into enterprise applications.

- Delivered OCPP-based charging APIs and the surrounding React tooling on an AWS microservices architecture.
- <ADD METRIC: e.g. "N chargers / sessions handled" / "M API req/day">
- **Stack:** Node.js, React, MongoDB, OCPP, AWS, Microservices, DevOps.

Senior Full-Stack Developer — Eloquentix · Apr 2014 – Mar 2020

Partnered with clients to build products from MVP to large-scale production across web platforms, data-intensive backends, and — where the project called for it — Ethereum/Solidity smart contracts.

- Worked across distributed systems (Apache Mesos, Cassandra) and container orchestration (Docker, Rancher).
- **Stack:** JavaScript, Node.js, AngularJS, Python, MySQL, Cassandra, Apache Mesos, Docker, Solidity.

Founder / Full-Stack Developer — Hostero · Jan 2018 – Jan 2020

Founded and built a product end-to-end (infrastructure + software) and ran the whole operation, developing product, ops, and marketing skills alongside engineering.

- **Stack:** JavaScript, Node.js, React, TypeScript, AngularJS, MySQL, Docker, Rancher.

Earlier experience · 2009 – 2013

Back-end Developer @ **Simply Social** (scalable social-media crawlers — Python, RabbitMQ) · Full-Stack @ **MMT** (SharePoint microsites & LMS web apps) · Co-Founder / Mobile Developer @ **Codeboxed** (early Appcelerator Titanium certified developer) · Full-Stack / Mobile @ **Eloquentix** (web + native iOS apps for clients). Languages: PHP, Python, JavaScript, Objective-C.

SELECTED OPEN-SOURCE PROJECTS

- **cshell** — a UNIX shell implemented in C (systems fundamentals).
- **real-estate-crawler** — a Node.js crawler for aggregating property listings.
- **iot** — JavaScript experiments for connected / IoT devices.

See more at github.com/morion4000.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, PHP
- **Frontend:** React.js, AngularJS, HTML5/CSS, Phaser 3
- **Backend:** Node.js, GraphQL, REST, Microservices, RabbitMQ
- **Databases:** MongoDB, MySQL, Cassandra
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Rancher, CI/CD
- **AI:** LLM integration
- **Also:** Ethereum / Solidity smart contracts, Objective-C

CERTIFICATIONS

- ConsenSys Academy Online Developer Program — 2018
